Data Analyst | Data Scientist

Jalgaon, Maharashtra, India | +91 9307124457 | anishamore003@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on internship experience and independently built, production-grade data analytics projects. Skilled in Python, SQL, Power BI, Scikit-learn, SHAP, and Streamlit, with proven ability to design end-to-end data pipelines, train and evaluate machine learning models, and deploy interactive analytics applications. Strong foundation in Explainable AI, customer analytics, and statistical analysis, with a track record of translating complex data into clear, actionable business insights.

TECHNICAL SKILLS

Languages & Libraries: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Plotly

Machine Learning & AI: Scikit-learn, Logistic Regression, Random Forest, Feature Engineering, EDA, SHAP (Explainable AI), NLP (basics), Generative AI & Prompt Engineering (working knowledge)

BI & Visualization: Power BI, DAX, Excel (PivotTables, VLOOKUP), Tableau (familiar), Streamlit, Interactive Dashboards

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Joblib

Core Concepts: ETL Pipelines, Data Cleaning, Data Wrangling, Customer Segmentation, Statistics, A/B Testing, REST APIs

PROFESSIONAL EXPERIENCE

Data Analytics Intern — Oasis Infobyte

Feb 2026 – May 2026 | Remote

- Built a fraud detection pipeline in Python using Pandas and Scikit-learn, engineering features and training classification models to flag anomalous transactions across real-world financial datasets.
- Analyzed 10,000+ Android app records across 33 categories to surface install trends and rating distributions, presenting findings through Matplotlib and Seaborn visualizations for stakeholder review.
- Performed end-to-end EDA, data cleaning, and preprocessing on multiple datasets, delivering analytical reports that informed data-driven business decisions.

FEATURED PROJECTS

ChurnIQ — AI-Powered Customer Churn Analytics Platform

Python, Scikit-learn, SHAP, Streamlit, Plotly, Pandas, NumPy, Joblib | [Live App](#) | [GitHub](#)

- Engineered 28+ features from raw telecom data spanning 7,043 customers, including tenure groups, charges-per-tenure ratio, and premium support flag, to strengthen churn prediction signal.
- Trained and benchmarked Logistic Regression and Random Forest models with 5-fold cross-validation and SMOTE class balancing, achieving an ROC-AUC of 84.7%.
- Integrated SHAP explainability (beeswarm, waterfall, and dependence plots) to surface individual churn risk drivers, enabling transparent, actionable retention strategies.
- Built a full Streamlit web application with an executive KPI dashboard, 10+ interactive Plotly charts, 4-tier risk categorization, and downloadable, AI-generated business insight reports.

AI-Powered Retail Analytics Platform

Python, Power BI, Pandas, Scikit-learn, Streamlit, DAX, Excel | [GitHub](#)

- Developed an end-to-end retail analytics solution processing multi-category sales data to identify top-performing SKUs, seasonal demand patterns, and regional revenue trends.
- Built interactive Power BI dashboards with custom DAX measures for YoY growth, running totals, and top-N product rankings, enabling self-serve BI for business stakeholders.
- Applied clustering-based customer segmentation to group buyers by purchase behavior, supporting targeted marketing and inventory optimization decisions.

EDUCATION

B.Tech in Data Science — G H Raisoni College of Engineering and Management, Jalgaon

Aug 2024 – Present (Final Year)

Diploma in Civil Engineering — R C Patel Polytechnic, Shirpur

Apr 2021 – May 2024

CERTIFICATIONS

- Data Analytics Internship Certification — Oasis Infobyte (2026)
- Data Analytics Internship Certification — SkillInfyTech (2026)
